Fabián Bustamante Aragón

Entry-Level Cybersecurity Analyst · Computer Systems Engineering Student

San José, Costa Rica · +506 8644 1913 · fabianbustamantemra@gmail.com · LinkedIn · GitHub

SUMMARY

Entry-level cybersecurity candidate with hands-on lab practice and professional experience communicating in English. Passed TryHackMe's hands-on SEC1 exam (SOC log analysis, network traffic analysis, web security, password attacks, malware analysis) and hold the Palo Alto Networks Cybersecurity Professional Certificate. Familiar with identity and access concepts (MFA, IAM, role-based access) and scanning with Nmap. From Tier 1 support I bring careful documentation, ticket ownership and clear escalation. Preparing for CompTIA Security+.

SECURITY LAB & TRAINING

Home Security Lab · Kali Linux on WSL, TryHackMe Premium 2024 – Present

- Passed the SEC1 hands-on exam (7 scenario-based sections): Windows/Linux fundamentals, network traffic analysis, web security, SOC log analysis, password attacks and malware analysis.
- Completed TryHackMe learning paths: Pre Security (Oct 2026, 19+ hours) and Jr Penetration Tester (Nov 2024).
- Practice with Nmap, Wireshark, Metasploit, Gobuster/DirBuster, John the Ripper and Hashcat in a self-managed lab.

EXPERIENCE

Technical Systems Developer · Hernández y Martins, S.A. (Grupo MH) Jun 2026 – Nov 2026

Garabito, Puntarenas, Costa Rica · Contract, weekends

- Designed and deployed a CCTV system across 2 sites with 32 IP cameras and NVR, plus alarm systems.
- Built the network with Cat 6 structured cabling, VLAN segmentation, static IP addressing, 2 switches and a wireless antenna link.
- Achieved 99.2% uptime with 24/7 recording, web and mobile remote monitoring, and local NVR backup.

Customer Support Representative (Tier 1) · Foundever May 2025 – Aug 2025

San Pedro, San José, Costa Rica · Phone-based technical support in English for Verizon customers

- Troubleshot device and network connectivity issues as Tier 1 support.
- Opened, documented and closed a ticket for every interaction.
- Escalated cases outside Tier 1 scope to Tier 2.

TECHNICAL SKILLS

Security: log analysis, network traffic analysis, web security basics, password attacks, malware analysis basics; MFA, IAM and RBAC concepts

Tools: Nmap (network and service scanning), Wireshark, Metasploit, Gobuster, John the Ripper, Hashcat

Networking: TCP/IP, DNS, DHCP, HTTP/HTTPS, LAN/WAN, VLAN, basic VPN

Systems & productivity: Windows 10/11, Linux (Kali), Microsoft 365

Scripting & data: Python, Bash, SQL

CERTIFICATIONS

- Cyber Security 101 (SEC1) – TryHackMe · Oct 2026
- Palo Alto Networks Cybersecurity Professional Certificate · Sep 2025
- CCNA: Introduction to Networks – Cisco · Dec 2024
- Ethical Hacker – Cisco · Nov 2024
- CompTIA Security+ · in preparation

EDUCATION

B.S. in Computer Systems Engineering (Bachillerato) · Universidad Fidélitas 2024 – Expected 2027

Over 70% of credits completed

LANGUAGES

Spanish (native) · English (B2+, professional; phone support in English at Foundever)
